

# INFORMATION NOW

## MICROSOFT® BUSINESS INTELLIGENCE WITH AFFECTO

Today more than ever before, information is everything. Your organisation has vast stores of it, but how do you get the right information to the right people fast? A Business Intelligence (BI) solution can help you by gathering data from multiple sources on a single platform, giving you a holistic real-time overview of your business. BI lets you draw instantly on all your data when making decisions, which means you avoid the need for guesswork and improve your competitiveness. And it makes your finances, forecasting and processes more transparent, which helps you to monitor and manage your performance. As all your employees have access to the same data, BI makes the flow of information through your business more efficient. What's more, it enables you to share your information with customers, partners and subcontractors, helping you to drive your business forward.

### BI THE MICROSOFT WAY

A BI solution from Microsoft allows you to access all the benefits of BI through your company's trusted and familiar Microsoft Office system. Powered by Microsoft SQL Server

technology, Microsoft BI is designed with all users in mind and has the flexibility to accommodate all the information you need. It is delivered through environments that you already know – Office Excel, Office Outlook and Office SharePoint Server – meaning you will not have to attend long training sessions or read complicated manuals. And, as it integrates seamlessly with your existing software systems, a Microsoft BI solution is easy to manage and scale, giving you unbeatable value for money.

**“AFFECTO'S CONSULTANTS HAVE THE HIGHEST LEVEL OF COMPETENCE AND EXPERTISE WITH MICROSOFT TECHNOLOGIES. CLIENTS COULD NOT BE IN BETTER HANDS WHEN IMPLEMENTING THEIR MICROSOFT BI SOLUTION.”**

Lars Juul Svenningsen

## GET THE MOST FROM YOUR MICROSOFT BI SOLUTION

Affecto can help you optimise your Microsoft BI solution. As a long-standing Gold Certified Partner, we have a close working relationship with Microsoft, and our consultants have years of experience from implementing Microsoft BI across all sectors of industry. They understand not only the technology behind BI solutions, but also the business processes they link to and aim to support. This means that, with Affecto, you can be sure that your Microsoft BI solution works the first time. From design to deployment, Affecto consultants liaise closely with you to tailor the Microsoft architecture to your specific needs, minimising your cost and maximising your competitive advantage. Building on your existing IT infrastructure, we make the solution easy to manage and scale. And we engage with your strategic goals, offering you a long-term partnership to ensure that your solution is future-proof.
